### TWYNING ASH FLEMMING

Twyning Ash Flemming is an impressive, easy calving sire who has been extensively used here in the UK. Thousands of high value progeny have been born with tremendous Blue roan calves. Calves are born lighter at birth but grow and develop into strong, well muscled young stock. Flemming is a multi-purpose British Blue sire that is easy to use in any herd looking for quality calves and finishing stock.

### TWYNING ASH HUNTER

Twyning Ash Hunter is the only registered pedigree son of elite Meadow Quality sire Twyning Ash Armstrong. Hunter is a superb young white bull from a reliable easy calving line. With the first calves now on the ground, Hunter is proving to be a popular sire for heifers. There is no wonder why the breeder has tipped him to be the next Ukulele!

### TWYNING ASH JAILER

Twyning Ash Jailer is one of the hottest British Blue bulls available right now. With an exceptional score for calving ease, superior quality of calves and distinctive blue roan markings, this sire is sure to be an easy choice for UK farmers. Perfect for farmers selling calves at 3-4 weeks of age. Jailer is one of the highest bulls available for carcase profitability index at +35

This premium British Blue mix contains 3 prolific sires from the renowned Twyning Ash stud, all of which are producing top quality calves and are exceptionally easy calving.

All 3 bulls have substantial 200, 400 and 600 Day growth rates and are of the highest ranking sires available in the UK.

Twyning Ash Jailer is one of the top bulls on the market for EBV's – infact he is so high on his EBV scores he ranks in the Top 1% of the Top 1% for all Growth Rates and both Pedigree Index and Carcase Profitability!

## **BLUE ENERGY CUSTOMERS ARE SATISFIED CUSTOMERS!**

'I have used 60 straws of Blue Energy from Mastergen since September 2016. I don't have a sweeper bull on the farm so I am using this mix as a sweeper option. All problem cows will be served to this from 3rd service. So far, 13 cows have confirmed in calf, with another 14 to PD, so if they all hold, my conception rate on difficult cows, using this mix, will be almost as good as my 1st service conception rate. I have ordered more Blue Energy as a consequence of my success so far.'

**Mr Paul Hodges, Higher Marsh Farm, Dorset**

'We have found Blue Energy has a 9% better conception rate compared to the single British Blue semen we were using.'

**Nick Pocock, Somerset**
